

# EVALUATION AND PROMOTION

## Pre-Primary

Based on the principles of fostering children's comprehensive and balanced development, the Kindergarten Educating Curriculum aims to help children achieve five development objectives, namely "Moral Development", "Cognitive and Language Development", with a view to nurturing children to attain all round development in the domains of ethics, intellect, physique, social skills and aesthetics.

We believe that every child understands and learns differently, so every child is assessed individually.

A wide range of activities and programs are planned on a regular basis to provide children with experience where they can explore their uniqueness and supplement their classroom learning.

Rather than burdening children with tests and exams, children are observed non intrusively and gauged on their individual developments.
